

Site Extraction Benchmark: 20 Suppliers

Our agent (25 Sep 2026 run) vs FutureSearch, scored against *Sites Sample Data.xlsx* (225 ground-truth sites) | 29 Sep 2026

	Our agent	FutureSearch	Using both
Street recall	74.2%	79.1%	83.1%
City recall	81.3%	85.8%	89.8%
Sites found	330	337	424 unique
Cost per supplier	\$0.30	\$1.30	\$1.60
Cost, 20 suppliers	\$6.05	\$26.00	\$32.05
Run time per supplier	3.6 min *	0.42 min	4.0 min
Run time, 20 suppliers	72 min *	8.4 min	80.4 min

* Sequential time. Our agent ran the 20 in 4 parallel workers: 24.6 min wall clock. Green = better of our agent and FutureSearch.

Key findings

- **Combined recall:** street 83.1%; FutureSearch adds 20 GT sites our agent missed, our agent adds 9.
- **FutureSearch's lead:** mostly BYK Additives (+9) and Hoshizaki (+7).
- **WeylChem:** our agent found 6 of 7; FutureSearch found 0, reporting sites of the renamed Catexel instead.
- **Per supplier:** our agent averages 75.5% street recall vs FutureSearch 74.5%; FutureSearch leads on the total.
- **Cost:** \$0.30 vs \$1.30 per supplier (4.3× cheaper).
- **Missing streets:** FutureSearch gave no street for 20 of 337 sites (13 at CPH Chemicals); our agent for 1 of 330.
- **Neither found:** Fine Will Industrial and Cafe de Mi Tierra.

Results by supplier

Supplier	GT sites	Sites found		Unique sites		Overlap	Street recall			City recall			Agent cost

CPH CHEMICALS B V	1	1	14	0	13	1	100%	100%	100%	100%	100%	100%	\$0.25
COLLOIDS	3	7	6	2	1	5	100%	100%	100%	100%	100%	100%	\$0.53
LEIPZIGER LOGISTIK UND LAGERHAUS	3	4	6	1	3	3	100%	100%	100%	100%	100%	100%	\$0.32
Total (all 225 GT sites)	225	330	337	87	94	243	74.2%	79.1%	83.1%	81.3%	85.8%	89.8%	\$6.05
Average recall per supplier							75.5%	74.5%	82.6%	85.2%	80.3%	87.2%	

Notes

- **Recall:** street = a ground-truth address matched one-to-one; city = any site in the same city. Total = GT sites found ÷ 225; average = mean of each supplier's recall.
- **Combined:** a GT site counts as found if either tool found it.
- **Unique sites:** sites the other tool did not report, matched by street address with the scoring rule.
- **Overlap:** sites both tools reported, matched the same way.
- **Green:** the higher of agent and FutureSearch recall for that supplier.
- **Cost and time:** agent cost is exact per supplier; FutureSearch's \$26.00 and 8.4 min are totals for all 20. Our agent ran the 20 in 4 parallel workers (24.6 min wall clock).

How ISO certificates improved the results

- **Multiple sources:** each site lists every page or document showing its address; 97 of 330 sites (29%) have 2 or more sources.
- **Confirmation:** 17 of the 167 matched sites are backed by a certificate PDF, a second independent source for the address.
- **Cost:** near zero; 53 PDFs read locally for free and only 3 needed a paid fallback.

Cost-saving changes: free sources before paid search

- **Free registry lookups:** the agent fetches GLEIF (LEI register), SEC EDGAR (10-K properties), Wikipedia and UK Companies House directly by URL, with no web search; GLEIF and Wikipedia were checked for all 20 suppliers.
- **Sitemap first:** it reads the supplier's sitemap.xml to find locations, contact and certificate pages without searching for them (19 of 20 suppliers).
- **Free page and PDF reading:** pages are read with a free plain fetch, then a ~\$0.001 browser fetch; PDFs are read locally, with OCR for scans.
- **Links reused, not searched:** PDF and certificate links on fetched pages are handed to the agent to open directly.
- **Search guards:** one certificate probe per supplier, near-duplicate searches refused, and no guessed domains.
- **Paid fallback capped:** at most 10 paid page retrievals per supplier and 2 per website.
- **Effect:** 515 page fetches, 420 web searches and 33 paid fallbacks for all 20 suppliers.
